Mark Andro Magtoto

FRONT-END DEVELOPER

My job is to build your website so that it is functional and user-friendly but at the same time attractive. Moreover, I add personal touch to your product and make sure that is eye-catching and easy to use. My aim is to bring across your message and identity in the most creative way.

WORK EXPERIENCE

Front End Developer

LB Solutions

08/2023 - Present
LB Solutions is a start up company
Achievements/Tasks

- **Front-End Framework:** Use a modern front-end framework/library such as Nuxt.js, or Implement a responsive design using a CSS framework of your choice (e.g., Bootstrap, Tailwind CSS).
- **API Integration:** Integrate with a RESTful API. You can use a public API or set up a mock API using tools like JSON Server or MirageJS.The API should allow the following operations on user profiles:Create a new userRetrieve a list of usersUpdate a user's information Delete a user
- **User Interface:** Create the following views/pages:A list view to display all usersA detailed view to show a single user's profileA form to create a new userAn edit form to update existing user informationImplement navigation between these views.
- **State Management:** Manage the application state effectively, handling API data and UI state.
- **Error Handling:** Implement error handling for the API requests.Show appropriate feedback to the user in case of API failures.
- **Bonus Features:**Add client-side validation to the user forms.Implement pagination or infinite scrolling for the user list view.Add a search feature to filter users in the list view.
- **Documentation:**A brief documentation outlining the design choices, libraries used, and any assumptions made during development.
